Hi.

I am Parth Ghumatkar.

A Technology Geek. I make drones, IoT, Automation & Python Coding.

ABOUT ME

I started coding at the age of 11 years and there was no looking back after it.

You can call me what you like but I wish to call myself a Technology Geek, who is totally into Automation, Drone Making, IoT, and everything else related to the ever-evolving technology!

I simply feel in love with the world of technology and now, I have been able to get acquainted with the very basics of programming.

my interests →

MY INTERESTS

Drone making is one of my interests and I can assemble its parts from scratch, without anybody's help.

YouTube has been a great helping hand while I was learning all these. I would watch programming videos for hours and practice those at home.

My father, Mr. Rakesh Ghumatkar, is my biggest support in my journey and he had been providing me with all the necessary merchandises.

Rakesh Ghumatkar

Founder & CEO, Perfect People Search

Automation Projects using Alexa

Drone Assembly and Flying

IoT (Internet of Things) Projects

Coding in Python, Arduino
